## About Us

Bookish Open Door is a charitable nonprofit organization created by BookishMedia in support of adult and young adult literacy. While Bookish focuses on memoir, travel and young-adult fiction with a consistent theme of crossing cultures, Bookish Open Door books address the under-served population of people who struggle to read. Together, they make a powerful literary combination to encourage reading.

Aarthi

Wings of Fire: An Autobiography of Abdul Kalam

### Amazing Motivational Hero

"Dr. Kalam was a researcher and not an essayist, but rather I anticipated a smidgen more human inclination in this book. It appeared as though he was simply posting his accomplishments without sharing his internal contemplations and battles. Generally, "Wings of Fire" left me feeling unfulfilled and exhausted. I was hoping to be enlivened by Dr. Kalam's biography, yet all things considered, I felt like I was simply perusing a dull reading material. I wouldn't prescribe this book to anybody searching for a charming journal or an individual record of Dr. Kalam's life. It basically neglected to satisfy my hopes."

### Discover Our Story

Cutting cataloguing budgets and support year after year and retirement after retirement is hurting the library in the long run and burning out the staff that remains. We need time and resources to learn the new models and standards at the same time we do our day to day work. This is work that now takes a bit longer to do - but in the long run we are making better records. The new linked data models have the potential for revolutionizing the services and information libraries can provide for their users and keep libraries relevant in an increasingly web-based information environment.
